Amazon	URL	TC_URL_001	1.1	URL Verification	Verify that when user enter Valid Amazon URL it can be Re-directed to Home Page or not	1. Open Browser 2. Enter URL 3. Press Enter button	www.Amazon.com	Amazon Home Page should be appearing after enter valid URL	Functionality							
	Create Account Validation	TC_Creats_002	1.2	Create account page Validation	Verify that User can able to see Create amazon account button in Login Page	1. Open the Browser 2. Pass the URL & Press Enter Button 3. Observe the Screen	Observe the Screen	Create amazon account button should be present in the Login Page	UI							
	Create Account Validation	TC_Creats_003	1.2	Create account page Validation	Verify that User can able to see the Sign in Page after click on the Create amazon account button	1. User Should be in Login page after click on the Create amazon account button 2. Observe the Screen	Obser the Screen	User Should see the Sign in Page after click on Create amazon account page	UI							
	Create Account Validation	TC_Creats_004	1.2	Create account page Validation	Verify that Sign in page Contains following Components Your name 2. Mob No 3. Email 4. Password 5. Continue Button	1.		Following components should be present in the Sign in Page 1. Your name 2. Mob No 3. Email 4. Password 5. Continue Button	UI							
	Create Account Validation	TC_Creats_005	1.2	Create account page Validation	Verify that User get login page after Provide Name in the alphanumeric form, valid Mob no valid Email, Password contains alphabets,numbers,special characters and click on continue button	1. Provide Your name 2. Provide valid Mobile No 3. Provide valid Email 4. Provide Password 5 Click on Continue button	1. Your name - Jeevan 2. Mob No- 9742884625 3. Email: jkpsavert8@gmail.com 4. Password- jeevan@123	User Should get Login page after Providing all the details in the Sign in-page and click on Continue button	Functionality							
	Create Account Validation	TC_Creats_006	1.2	Create account page Validation	Verify that User get login page after Provide Name in the alphanumericform, form, valid Mob no valid Email, Password contains alphabets,numbers,special characters and click on continue button	1. Provide Your name 2. Provide valid Mobile No 3. Provide valid Email 4. Provide Password 5 Click on Continue button	1. Your name - Jeevan123 2. Mob No- 97428846876 3. Email: jkpsavert8@gmail.com 4. Password- jeevan@123	User Should not get Login page after Providing Invalid Your name and provide valid remaining details in the Sign in page and click on Continue button	Functionality							
	Create Account Validation	TC_Creats_007	1.2	Create account page Validation	Verify that User get login page after Provide Name in the alphanumeric form, InvalidMob no invalid Email, Password contains alphabets,numbers,special characters and click on continue button	1. Provide Your name 2. Provide Invalid Mobile No 3. Provide valid Email 4. Provide Password 5 Click on Continue button	1. Your name - Jeevan123 2. Mob No- 97428846876 3. Email: jkpsavert8@gmail.com 4. Password- jeevan@123	User Should not get Login page after Providing valid their names and Invalid Mob No and valid remaining details in the Sign in-page and click on Continue button	Functionality							
	Create Account Validation	TC_Creats_008	1.2	Create account page Validation	Verify that User get login page after Provide Name in the alphanumeric form, valid Mob no invalid Email, Password contains alphabets,numbers,special characters and click on continue button	1. Provide Your name 2. Provide valid Mobile No 3. Provide Invalid Email 4. Provide Password 5 Click on Continue button	1. Your name - Jeevan123 2. Mob No- 97428846876 3. Email: jkpsavert8@gmail.com 4. Password- jeevan@123	User Should not get Login page after Providing valid your name and valid Mob No and Invalid remaining details in the Sign in page and click on Continue button	Functionality							
	Create Account Validation	TC_Creats_009	1.2	Create account page Validation	Verify that User get login page after Provide Name in the alphanumeric form, valid Mob no valid Email, Password contains only alphabets and click on continue button	1. Provide Your name 2. Provide valid Mobile No 3. Provide InvalidEmail 4. Provide InvalidPassword 5 Click on Continue button	1. Your name - Jeevan123 2. Mob No- 97428846876 3. Email: jkpsavert8@gmail.com 4. Password- jeevan	User Should not get Login page after Providing valid your name and valid Mob No and valid email and only alphabets password in the Sign in-page and click on Continue button	Functionality							
	Create Account Validation	TC_Creats_010	1.2	Create account page Validation	Verify that User get login page after Provide Name in the alphanumeric form, valid Mob no valid Email, Password contains only number and click on continue button	1. Provide Your name 2. Provide valid Mobile No 3. Provide valid Email 4. Provide InvalidPassword 5 Click on Continue button	1. Your name - Jeevan 2. Mob No- 97428846825 3. Email: jkpsavert8@gmail.com 4. Password- 12345	User Should not get Login page after Providing valid Your name and valid Mob No valid Email and only number password in the Sign in page and click on Continue button	Functionality							
	Create Account Validation	TC_Creats_011	1.2	Create account page Validation	Verify that User get login page after Provide Name in the alphanumeric form, valid Mob no valid Email, Password contains only special character and click on continue button	1. Provide Your name 2. Provide valid Mobile No 3. Provide valid Email 4. Provide InvalidPassword 5 Click on Continue button	1. Your name - Jeevan 2. Mob No- 9742884625 3. Email: jkpsavert8@gmail.com 4. Password- "\$#@&%"	User Should not get Login page after Providing valid your name and valid Mob No, valid Email and only special character password in the Sign in-page and click on Continue button	Functionality							
	Create Account Validation	TC_Creats_012	1.2	Create account page Validation	Verify that User get login page after Provide Name in the alphanumeric form, Invalid Mob no Invalid Email, Password contains only special character and click on continue button	1. Provide Invalidfour name 2. Provide Invalid Mobile No 3. Provide Invalid Email 4. Provide InvalidPassword 5 Click on Continue button	1. Your name -Jeevan123 2. Mob No- 97428846876 3. Email: jkpsavert8@gmail.com 4. Password- "\$#@&%"	User Should not get Login Page after providing all Invalid Details	Functionality							
	Create Account Validation	TC_Creats_013	1.2	Create account page Validation	Verify that User get login page they not fit any of the details	Leave all field blank	1. Your name -empty 2. Mob No -empty 3. Email -empty 4. Password -empty	User Should not get Login Page when they leave all the field blank , It shows error message "This field is mandatory"	Functionality							
	Login Page Validation	TC_Login_014	1.3	Login Page Validation	Verify that Login Page Contains Email or Phone No Test text and continue button	Observe the Screen	Observe the Screen	Login page should be displayed with following components Email or Phone No Textfield and continue button	UI							
	Login Page Validation	TC_Login_015	1.3	Login Page Validation	Verify that User can able to login by providing Registered valid Email id	Provide Registered Valid Email Id	jksavert8@gmail.com	Login Successfully User should get Home Page after Login Successfully	Functionality							
	Login Page Validation	TC_Login_016	1.3	Login Page Validation	Verify that User can able to login by providing UnRegistered valid Email id	Provide UnRegistered Valid Email Id	jeevankumar123@gmail.com	Invalid Email	Functionality							
	Login Page Validation	TC_Login_017	1.3	Login Page Validation	Verify that User can able to login by providing Registered valid Mob Number	Provide Registered Valid Mob Number	Mob No- 9742884625	Login Successfully User should get Home Page after Login Successfully	Functionality							
	Login Page Validation	TC_Login_018	1.3	Login Page Validation	Verify that User can able to login by providing UnRegistered valid Mob Number	Provide UnRegistered Valid Mob Number	Mob No- 9742884634	Invalid Mobile Number	Functionality							
	Login Page Validation	TC_Login_019	1.3	Login Page Validation	Verify that User can able to login by Leave blank on Email or Mob No Testfield	Leave Email or Mob No field Blank	Email or Mob No - Empty	It should show proper error message "This Field is Mandatory"	Functionality							
	Home Page Validation	TC_Home_020	1.4	Home Page Validation	Verify that User can able to see the Home Page after Login Successfully	1. Provide Registered Valid Email Id or Valid Mob No 2. Click on Continue	Email Id- jksavert8@gmail.com or Mob No- 9742884625	User Should see Home Page after login successfully.	Functionality							
	Home Page Header Tabs Validation	TC_Home_021	1.4	Home Page Header Tabs Validation	Verify that Header Tabs Present in the Home Page	Observe the Screen	N/A	Header Tabs should be Present in the Home Page	UI							
	Home Page Header Tabs Validation	TC_Home_022	1.4	Home Page Header Tabs Validation	Verify that it is Re-Directed to corresponding page after click on the Header Tab in the Home Page	Observe the Screen	N/A	It Should Re-directed to corresponding Page after click on the Header Tab in the Home Page	UI							
	Home Page Logo Validation	TC_Home_023	1.4	Home Page Logo Validation	Verify that Amazon Logo is Present in the Home with Proper Color, Corner Spelling and with Proper Design.	Observe the Screen	N/A	Amazon Logo Should be Present in the Home Page with Proper Color,corner spelling and with Proper Design	UI							
	Home Page Country Logo with Drop Down Validation	TC_Home_024	1.4	Home Page Country Logo with Drop Down Validation	Verify that Country Logo along with Language Drop down is Present in the Home Page	Observe the Screen	N/A	Country Logo with its Drop Down Should be Present in the Home Page.	UI							
	Home Page Language Drop Down Validation	TC_Home_025	1.4	Home Page Language Drop Down Validation	Verify that User can able to select any language in the Language Drop down	Select any one Language	N/A	User Selected Language Should be Selected in the Language Drop Down	Functionality							
	Home Page Select your Address Option Validation	TC_Home_026	1.4	Home Page Select your Address Option Validation	Verify that Hello Select your Address option is Present in Home Page.	Observe the Screen	N/A	Hello, Select your address option Should be Present in the Home Page	UI							
	Home Page Select your Address Option Validation	TC_Home_027	1.4	Home Page Select your Address Option Validation	Verify that it is Re-directed to corresponding Page after click on the Hello, Select your address Option	Click on the Hello,Select your address Option in the Home Page	N/A	It Should Re-directed to corresponding Page after click on the Hello,Select your Address Option.	UI							
	Home Page Returns & Orders Option Validation	TC_Home_028	1.4	Home Page Returns & Orders Option Validation	Verify that Returns & Orders Option Present in the Home Page	Observe the Screen	N/A	Returns & Orders Option Should be Present in the Home Page	UI							
	Home Page Returns & Orders Option Validation	TC_Home_029	1.4	Home Page Returns & Orders Option Validation	Verify that it is Re-directed to Corresponding Page after click on the Returns & Orders Page	Observe the Screen	N/A	It Should be Re-directed to Corresponding Page after click on the Returns & Orders Option in the Home Page.	UI							
	Home Page Add to Cart Validation	TC_Home_030	1.4	Home Page Add to Cart Validation	Verify that Add to Cart Option is Present in the Home Page	Observe the Screen	N/A	Add to Cart Option Should be Present in the Home Page	UI							
	Home Page Add to Cart Validation	TC_Home_031	1.4	Home Page Add to Cart Validation	Verify that it is Re-directed to Corresponding Page after click on the Add to Cart Option in the Home Page.	Observe the Screen	N/A	It Should be Re-directed to Corresponding Page after click on the Add to Cart Option in the Home Page.	UI							
	Home Page Search Functionality Validation	TC_Home_032	1.5	Home Page Search Functionality Validation	Verify that Search Functionality is Present in the Home Page.	Observe the Screen	N/A	Search Functionality Should be Present in the Home Page.	UI							
	Home Page Search Functionality Validation	TC_Home_033	1.5	Home Page Search Functionality Validation	Verify that User enters Existing Product name in the Search Functionality and click on Search Icon Button it is Re-directed to corresponding Page	Provide Existing Product name in the Search Textfield	OPPO	It should Redirected to Corresponding Page	UI							

Home Page Search Functionality Validation	TC_Home_034	1.5 Validation	Home Page Search Functionality	Verify that User enters Existing Product ID in the Search Functionality and click on Search icon. Button is Redirected to corresponding Page	Provide Existing Product ID in the Search Textfield	F17PRD	It should Redirected to Corresponding Page	UI
